THIS IS UNEVALUATED INFORMATION

1. A hard surface, all weather road **[[924]]** runs from Satoral, roughly eastward to Cerna via Kral Chlumec (Király Helence). It is over two lanes wide, and is in good condition. It is constructed for heavy usage. The top layer is asphalt surfaced (black top). It runs over shallow rolling hills and it has very few shallow curves. The road is crowned for easy drainage. 25X1
2. A loose surface, all weather road **[[909]]** runs from Kral Chlumec northward to Bol. The road has a good solid foundation and the top layer is gravel surfaced. It is in good condition and is able to absorb heavy usage. The road is approximately two lanes in width.
3. A number of loose surface, dry weather dirt roads **[[935]]** run in the vicinity of Kral Chlumec, Saentes and Dobra. Some of the dirt roads in addition to being classed as principal dirt roads are also considered to be both secondary dirt roads and also cart tracks. All of the dirt roads and cart tracks are approximately over one lane in width. Occasionally they are able to absorb heavy usage. However when it rains or during spring when the snow melts both the dirt roads and cart tracks become potholed and in some sections become a quagmire. When this occurs the traveler gets off the road and rides alongside the farmers' fields. 25X1

INFORMATION REPORT INFORMATION REPORT**NO DISSEM ABROAD****LIMITED**

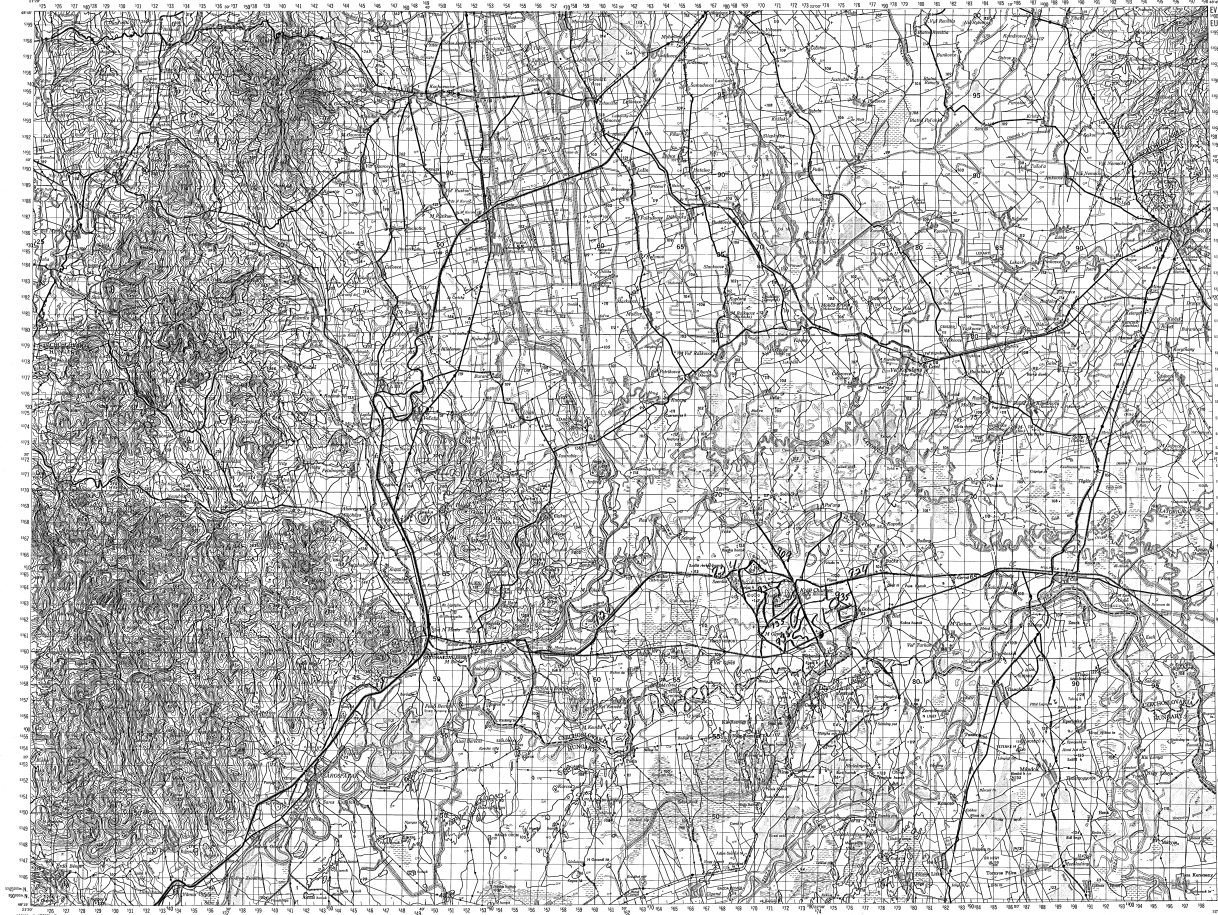

NOFORN
LIMITED: Dissemination limited to full-time employees of CIA, AEC and FBI; and, within State and Defense, to the intelligence components, other offices producing NIS elements, and higher echelons with their immediate supporting staffs. Not to be disseminated to consultants, external projects or reserve personnel on short term active duty (excepting individuals who are normally full-time employees of CIA, AEC, FBI, State or Defense) unless the written permission of the originating office has been obtained through the Assistant Director for Central Reference, CIA.
